

SAMEEN K A

Full Stack Developer

📍 Ernakulam, Kerala | ✉ sameensameen60@gmail.com | ☎ +91 9562718577 | 🔗 [LinkedIn](#)
🐙 [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack Developer who thrives on taking ownership from designing system architecture and database schemas to leading teams and sitting in client meetings. Skilled in the **MERN stack** and **React Native**, with a strong focus on **real-time applications** and **performance optimization**. Recently architected a backend single-handedly that handles **500+ simultaneous users and 250+ live calls** on a free-tier server. Equally comfortable writing code, mentoring junior developers, and translating business needs into production-ready products.

PROFESSIONAL EXPERIENCE

Veevity Technologies

Apr 2025 – Present

Team Lead & Senior Engineer

- **Leading a team of 7-10 developers** across multiple projects, ensuring on-time delivery and code quality standards.
- **Spearheaded 2 major projects** from concept to near-production deployment within a short timeframe.
- **Architecting real-time communication mobile application** using **React Native**, **LiveKit**, and **NativeWind** featuring audio/video calls with coin-based monetization.
- **Driving technical decisions** on architecture, technology stack selection, and development best practices.
- **Representing the company in client meetings**, gathering requirements, and translating business needs into technical specifications.
- Implementing **CI/CD pipelines** and establishing coding standards to improve team productivity and code maintainability.

Growhut Technologies

Dec 2024 – Apr 2025

MERN Stack Developer

- **Led frontend development** for a large-scale enterprise application using **Next.js**, serving banking and financial sector clients.
- **Optimized application performance** by implementing **Redis caching** strategies, significantly reducing API response times and server load.
- **Improved frontend performance** through strategic caching mechanisms, lazy loading, and code splitting techniques.
- **Mentored 2 junior developers** on React.js best practices, code review processes, and debugging techniques.
- **Collaborated with 1 senior developer** to establish frontend architecture patterns and component libraries.
- Enhanced cross-team collaboration by streamlining development workflows and implementing effective communication practices.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+), TypeScript, SQL
- **Frontend Development:** React.js, Next.js, Vue.js, Redux, Redux Toolkit, HTML5, CSS3, Bootstrap, Tailwind CSS, EJS
- **Mobile Development:** React Native, NativeWind, Expo
- **Backend Development:** Node.js, Express.js, RESTful APIs, WebSocket
- **Databases:** MongoDB, PostgreSQL, Redis (Caching)
- **Real - Time Communication:** Socket.io, LiveKit, WebRTC
- **Cloud & DevOps:** AWS (EC2, S3), NGINX, PM2, Git, GitHub
- **Payment Integration:** Razorpay
- **AI Integration:** Gemini API, AI-driven automation
- **Architecture & Patterns:** MVC, Repository Pattern, Clean Architecture, Microservices basics
- **Tools & Others:** VS Code, Figma, Postman, Firebase, JWT, Mapbox

KEY PROJECTS

LoopCall – Real - Time Random Calling Platform

🔒 Private Repository

A real-time mobile application enabling users to connect with random people through audio/video calls, powered by a coin-based monetization system (Loop Coins). Built with Flutter on the frontend and Node.js on the backend.

- **Single-handedly architected and built the entire backend** from scratch – system architecture, database schema design, caching layer, and production deployment.
- **Designed the complete UI/UX** and provided detailed wireframes and specifications to the frontend Flutter development team.
- Engineered a **high-concurrency real-time signaling server** using **Socket.io** and **WebRTC**, capable of handling **500+ simultaneous users** and **250+ concurrent calls** on a single free-tier AWS EC2 instance.
- Implemented **Redis caching** and optimized database queries to achieve minimal latency in real-time user matchmaking and call signaling.
- Established **clean architecture** with repository pattern, ensuring long-term maintainability and scalability.

Tech Stack: Node.js, Express.js, TypeScript, MongoDB, Redis, Socket.io, WebRTC, AWS EC2, PM2, NGINX

TalkToPro – Expert Consultation Platform

🔒 Private Repository

A comprehensive platform connecting users with industry professionals for real-time consultations and expert guidance.

- **Led end-to-end development**, managing the team and delivering a fully functional production application.
- Integrated **AI-powered assistant** using **Gemini API** for automated responses and user guidance.
- Built **secure payment system** with Razorpay for subscription management and service payments.
- Designed **scalable architecture** deployed on **AWS**.

Tech Stack: Node.js, Express.js, React.js, MongoDB, JWT, AWS, Razorpay, Gemini AI

EDUCATION

Bachelor of Science in Computer Science

2020 – 2023

Swamy Saswathikananda College, Poothotta | Mahatma Gandhi University, Kerala
